

## Manufacturing Ltd.

**"Striving to make the casting and prototype industry safer and more productive."**

**R<sup>3</sup>** Manufacturing's new ASME-code casting apparatus fills the void between high dollar casting systems and home built (dangerous) tanks. Simply put the most economical system on the market today. Just pick the options you want to fit your needs and your budget.

R3's system is the perfect way to get started casting urethane parts or to economically expand a current program.

We make what you want and work with you on the details. Our design services team can provide you with engineering information as well as detailed CAD drawings for your project. If you need custom tanks for your business, we will make you the tanks you want with superior quality, service and speed, at a value that is better than anywhere else.

### Features:

- Huge 24" diameter X 48" straight casting environment
- Larger tanks upon request
- Swivel casters for easy maneuverability
- No sag door hinge system
- Easily replaced door seal
- Minimizes downtime so you maximize profits
- Quick-seal door latching system utilizes 5 eccentric levers for quick loading
- Adjustable casting environment pressure level
- Variable casting cycle times
- Max pressure safety pop-off valve to avoid over pressurizing
- An audible and visual cycle complete notice
- Multiple inlet & output ports
- Attractive, durable urethane finish

Pressure vessels require expertise to manufacture. Knowledge and expertise are keys to the production of safe and long lasting pressure vessels. Custom tailoring the product to meet your specific needs is critical, and an area at which we excel. There are many guidelines and regulations associated with pressure vessels.
